## **Academic Infrastructure**

**Studio spaces** – Areas:252.95 sq. mts, 247.5 Sq. Mts.[2 no.], 224 Sq. Mts. [2 no.] & 166 Sq. 65.10 Mts. each on various levels from the ground floor to the fourth floor. There is a total of 7 no. of studios, out of which 2 are for B. Arch. and 2 are for M.Arch. for each from 1<sup>st</sup> to 5<sup>th</sup> yr. B.Arch. course on each floor from the Ground to the 4<sup>th</sup> floor. Each one is provided with the required number of Tables with drawing boards of Imperial size & Stools and also having projector with scree, White & Black Boards, Lockers for storage of Drawings, T-squares & Set-squares and books, etc. so that students do not have to carry them home every day. These spaces have one of its longer sides facing the external face of the building from where they are deriving natural light and with the help of ventilators on the opposite sides, have enough cross-ventilation inside each of the studio spaces. All the studios have Wi-Fi and internet cable connectivity with enough plug points to connect their laptops.

### Library:

PiCA library is located on the second floor with a floor area of 202 sq. mt. PiCA Library caters to the students of Architecture, where the library functions not only as a reference guide but a valuable resource in sculpting students' life.

PiCA Library maintains a core collection of more than **7200** valuable books. The diversity of the library collection includes reference books, textbooks, national and international periodicals, bound journals, University papers, project reports, standards and non-print materials such as CDs, maps, etc. The library maintains a separate reference collection consisting of Encyclopaedias, dictionaries, directories handbooks, and atlases. We add more than 200 books to our collection every year for the benefit of our users. Accession registers for various collections are maintained properly.

The environment of the library is very lively and fresh. It also has WiFi, scanning, printing and photocopy facility.

## E-Learning Studio

PiCA faculty can utilize the E-Learning studio, also known as the light board studio, to produce high-quality E-learning content for both students and the general community. Within this studio, instructors face the audience directly while creating content on a light board. Additionally, the facility is equipped with state-of-the-art recording software and hardware to ensure the creation of top-notch online E-learning materials.

## **Laboratories and Workshops**

PiCA focuses on learning by doing methods for that, PiCA has developed its entire infrastructure around laboratories and workshops.

### **Computer Lab**

The lab is located on the 2nd floor with an area of 60 sq. Mts

Computer Lab is a special facility for students and staff alike. It is enabled with updated ITC facilities with Projector, WIFI and internet LAN connection to each PC.

There are 60 numbers of configured desktop computers in all here – with a computer-student ratio of 1:6, 2 routers [servers] with internet facility with two licensed soft wares [AutoCAD in 60 & GIS in 20].

## **Environmental Lab and Services Lab**

The lab is located on the 4<sup>th</sup> floor with an area of 51.19 sq. Mts.

In order to make students aware of the importance of designing according to the climate and sustainable aspects, an Environmental Science lab has been established.

The lab consists of a live heliodon tool which helps in determining the at which sunbeams strike a physical model of a building or landscape, this helps architecture students design the building form, orientation and massing, shading devices, etc. It is an interactive hands-on teaching tool for testing and comparing alternative designs.

The lab also consists of equipment to measure temperature, humidity, wind speed, and daylight levels that serve in educating students.

## Building Services Lab

(Drainage and water supply) is developed for the academic purpose which is demonstrative in nature.

The entire setup demonstrates a plumbing and water supply system. Common mistakes on site are also highlighted so that they could be avoided during execution. The toilet demonstrates appropriate plumbing fixtures, a unique plumbing layout of water supply pipes, accessories appliances and an overall ambience. The lab also shows the latest plumbing materials, various water supply pipes etc. It also demonstrates types of valves, traps, gauges, regulators etc. Various pumps with accessories also can be seen.

The lab serves the purpose of educating the students on the need for good plumbing and the way to install it most easily.

## Lighting and Acoustics Lab

Lighting and Acoustics is an integral part of interior architecture and design, that allows students to understand technical and artistic concepts of the subject.

Lighting lab focuses on lighting effects on materials and their elements encouraging students to understand the dynamics of light within a space.

The Acoustics lab promotes methodologies, acoustic material characterization and sound quality analysis.

Hands-on exercise focusing on both actual measurements and simulations, helps students to develop a professional attitude for applying theoretical principles to the solution of architectural problems and trains them to use the tools.

## **Construction Lab and Material Museum**

The Lab is located on the fourth floor with an area of 51.29 sq. mt.

The Construction technology lab intends to exhibit different materials of construction as available in the market (raw form) as well as the sample installation of various construction details; envisaging the course curriculum over the five years.

Materials of construction may include samples of various types of stones (with different sizes used for specific applications in construction), samples of different classes of bricks, types of different wood/plywood with variable sizes available in the market, types of glass with varying thicknesses, tor steel samples, different steel sections (I, L, T C sections) and other contemporary materials of construction.

Samples of construction details include constructed samples of Bricks walls and stone walls of different types, structural details of reinforcement cage elaborating details of foundation, column/ beam junctions, beam to slab junctions etc- to actual scale, various stages of surface finishes (Unfinished wall/ 1<sup>st</sup> coat/ 2 coat / final coat etc, samples of Mud, Lime and cement mortars, installation details and fixtures for glass and Aluminum Composite material installations.

Installations and displays of actual material make the construction lab more informative and interactive for the students.

### **Surveying Lab** – [It is part of the Construction & Material Lab.]

This lab provides essential surveying equipment for the students to familiarize with the practical surveying technique in the construction field. It also provides students with hands-on experience to supplement instruction in surveying courses. The Laboratory has a wide variety of modern surveying equipment, such as Theodolites, and levels for basic instructional and research purposes.

The objective of this lab is that the students use the laboratory as an integral part of their surveying coursework and obtain any topographic information that can help their design projects.

**Theodolite** - Setting horizontal angle, angle measurement, etc.

**Level** - Levelling operations by obtaining a precise horizontal line of sight

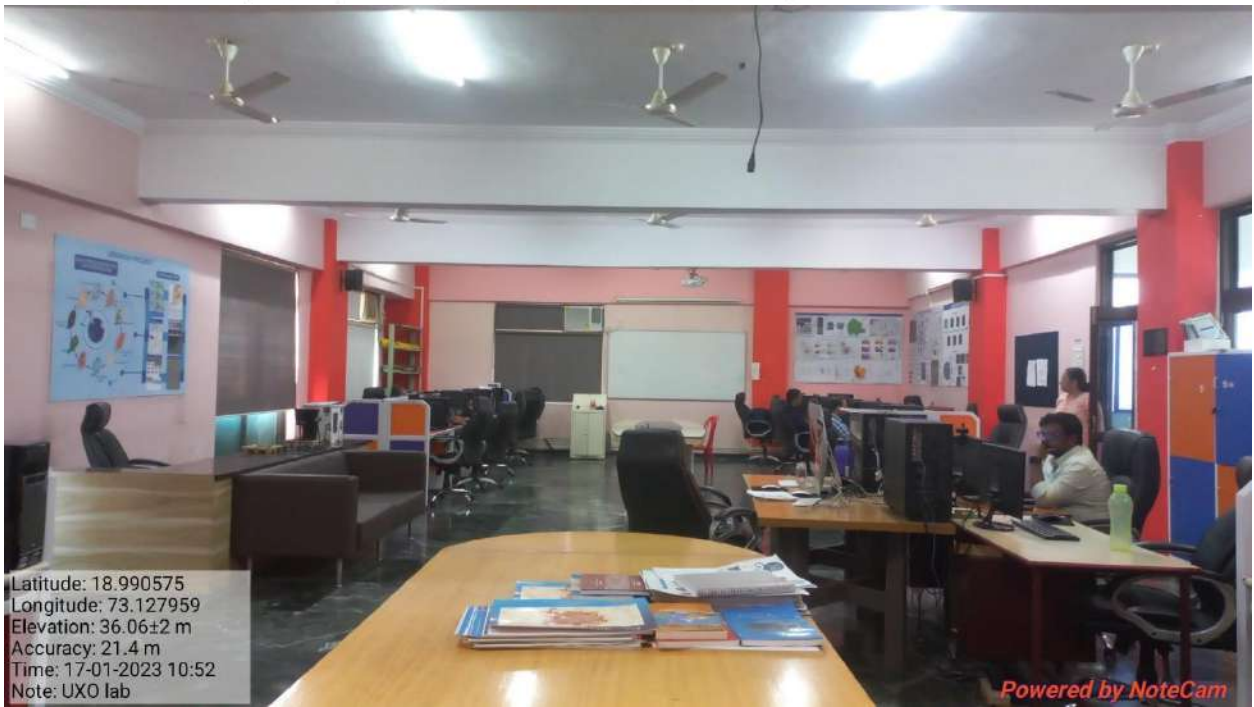

**Other accessories** - Aluminum staffs, prism poles, rod levels, tripods, metal pegs, target plates, compass, chain, water level tube, etc. Student use of the lab is preceded by appropriate safety training and instruction on the use and care for the equipment.

### **Centre of Excellence in future studies**

This lab is located on the 7<sup>th</sup> floor and it is a shared facility of MES Pillai's New Panvel campus. It is a special-purpose lab. The purpose behind the lab is that the cities in developing countries are rapidly expanding. India has 438 cities with a population of more than 100,000 people, accounting for 11% of the world's cities. It is expected that the urban population will be doubled in the next 25 years. Unfortunately, the development is unplanned and chaotic, resulting in inequitable distribution of public services, costly housing, a lack of adequate streets and roads, and insufficient open spaces. Therefore, the Pillai group of institutes has a dedicated facility where faculties and students from PiCA and other institutes on the campus do research work on poor urban planning, nonavailability of affordable housing, deficiency in water supply or electricity, unorganized traffic, poor quality public transport and parking facilities, poor healthcare system, waste management, air and water pollution, etc.

### Research and Innovation Centre

The lab is located on the ground floor and it is a shared facility of MES Pillai's New Panvel campus. The lab is consisting high-end laptops and various types of drones, where students can research and develop projects, and various software are used like Solid Works, Java net Beans, Android SDK, Matlab, Kill, Arduino, etc. Also, many softwares are provided as per the project need. The lab has wifi and LAN connection.

## Workshops

### **Model-making Workshop –**

Model making workshop is located on the ground floor with a floor space of 51.19 sq. Mts. Model-making workshop helps students to experiment with different materials and work on different scales. In this space, students work on their various design stages models along with models for competition projects. The advantage of this workshop is that work of model making can be left midway and can be continued afterwards without bothering to manage the stuff all the time, which saves on their time and also provide uninterrupted continuity of work.

### Printing and laser cutting workshop (Makerstudio)

The lab is located on the ground floor and it is a shared facility of MES Pillai's New Panvel campus. The Pillai campus is furnished with the latest technology for students. The 3D printing technology helps students to make scaled models and analyse the design in real time. Laser-cutting machines help in making fast and detailed architectural and other allied subject models.

## Administrative Area

### Principal's Office including Lounge for Visitors and Conference Room

It is located on the 2<sup>nd</sup> floor with a floor area of Area: 42.3 Sq. Mts.

A 26.5 sq. The Mts. area office allows 3 visitors, and the back ledge & side table has a large Executive table for the principal. Also provided with an intercom, a desk-top computer with printer of A3 size with ample light from the corridor side which has got a large glass panel. The Visitor's Lounge allows students, parents, and guests to wait patiently and comfortably. And it extends into the entrance lobby which is overlooking to mango courtyard. The entire area is WIFI enabled.

The Attached Conference room is used to conduct faculty meetings, discussions, briefings for juries, meeting with guests, etc. This space is also used for discussions to plan various events for the departments by the students under the supervision of the faculties. The room has top-notch ICT facilities such as Projector, portable mic and speaker, WiFi and LAN connections, area also has provision to connect laptops and desktops if needed.

## **Staff Rooms**

Staff Rooms are the areas which are mostly used by the faculties when they are not teaching and carrying out their research work, assignment corrections, preparing course plans and term plans, etc. This space is also utilized for discussions with the students if needed. In PiCA staff rooms are located on five floors along with the studios so that faculties can have good supervision of students and students can have easy access to their faculties. All staff rooms are equipped with one desktop computer with LAN and WIFI connection along with one printer for smooth functioning of the work.

## Exam Cell

The hall admeasures 33.80 sq. mt. and is located on the 4<sup>th</sup> floor. This area is used for preparing examination timetables for students and staff; creating seating plans for each examination; briefing candidates, staff and parents; receiving, checking and securely storing confidential examination materials; administering internal assessments etc. The room is on a secured Wi-Fi Network with backup charging and LAN (networking) points at regular intervals

## Exhibition and Jury Room

The hall admeasures approximately 151.90sq. mt. and located on the 5<sup>th</sup> floor. This is envisaged to be a multi-functional space. Hence, the hall can be configured to serve as a seminar / Viva-Voce/ exhibition room.

The entire space can be used singularly or divided into two halves. The entire space comprises flexible & stackable furniture, which can be re-arranged to suit the nature of the above-mentioned functions. The walls are clad with soft/pin-up boards for exhibitions. The walls and the ceiling are acoustically treated to limit noise transference and reverberation.

From a technology standpoint, the room is on a secured Wi-Fi Network with backup charging and LAN (networking) points at regular intervals along the wall surface.

## Shooting Range

PiCA takes pride in its exceptional 6-lane Olympic-level rifle shooting range situated on campus. The campus has a remarkable track record, with its students representing MES Pillai's new Panvel campus in prestigious events like the 2016 Olympics. Moreover, they have achieved remarkable success, securing medals in various competitions such as the Commonwealth Games, as well as excelling in numerous national and international contests.

## **B. Cultural Facilities**

While games, sports and athletics directly contribute to the physical development of students, other co-curricular activities such as cultural events also indirectly contribute to it. These activities provide a useful channel for the growth and development of student's mind and body. Student Council of PiCA very actively conducts cultural events throughout the year.

Event like Traditional Day is always cherished by Pica. Students wear traditional outfits to depict different cultures of India. Faculty also actively participate and appreciate these events.

Event like Pica's Got Talent encourages students to expose their talents by participating in activities like classical dancing, semi-classical dancing, singing, stand-up comedy and a one-act play. We have conducted theatre workshops to enhance the acting skills of students. Artists related to theatre performances performing in commercial and experimental theatre were invited to guide the students.

Students of PiCA participate in campus-level cultural competitions. Alegria is a very well-known and prestigious festival on the campus under which cultural competitions are held. PiCA has witnessed events like dancing competitions (Classical, Semi Classical, Freestyle), singing competitions, fashion shows, beatboxing and B-boying organized by the Alegria committee every year. Students of PiCA are part of the organizing, publicity, logistics and creativity committee during the Alegria Festival.

## **Canteen**

The canteen at MES Pillai's New Panvel campus, known as EPIC café, occupies a spacious area of 428 sq. mt. and is a shared facility. It serves as an integral part of student life, where students can engage in conversations and discussions on various topics, relieving stress and rejuvenating themselves.

Recognizing the needs of students who commute from distant places, the canteen serves nutritious food to take care of their health and hunger. Many students also rely on the canteen for their breakfast and evening tea with snacks. The strategic location of the canteen ensures easy accessibility for all students, and its thoughtful design caters to their requirements.

The canteen's seating area is vibrant, airy, and filled with natural light, providing ample space for students to relax, chat, and enjoy their meals. In line with promoting sustainability, the canteen has taken steps to reduce the campus's carbon footprint. This includes the installation of a plastic bottle recycling machine, which not only contributes to environmental conservation but also spreads awareness among students about the importance of sustainability.

EPIC café is not only a place to satisfy hunger but also serves as a social hub where students connect, interact, and create lasting memories during their time at MES Pillai's New Panvel campus.

## **Green Infrastructure**

### **Plastic Bottle Recycling Machine**

On World Environment Day (5th June 2019), Pillai College of Architecture, in collaboration with Reliance India Ltd., took a significant step towards environmental conservation. They installed a Biocrux Plastic Bottle Recycling Machine (PBRM) at Dr. K. M. Vasudevan Pillai Campus in New Panvel. Biocrux India is a leading provider of sustainable solutions for PET waste.

The installation of the PBRM marks a small yet important initiative towards preserving the environment at the campus. It is expected to be a substantial stride in creating a cleaner and greener, Smart New Panvel in the future. This joint effort is a testament to the college's commitment to promoting sustainable practices and fostering a responsible approach towards waste management.

## **Rain Water Harvesting**

PiCA holds a firm belief in water conservation and the preservation of natural resources. To achieve this goal, the campus has implemented a rooftop rainwater harvesting system. Rainwater is collected from the rooftops and is either stored in barrels or directed to underground water pools. The harvested rainwater is then utilized to water plants and trees on the campus. By adopting such sustainable practices, PiCA demonstrates its commitment to environmental responsibility and the efficient use of water resources.

## **Solar Power Generation**

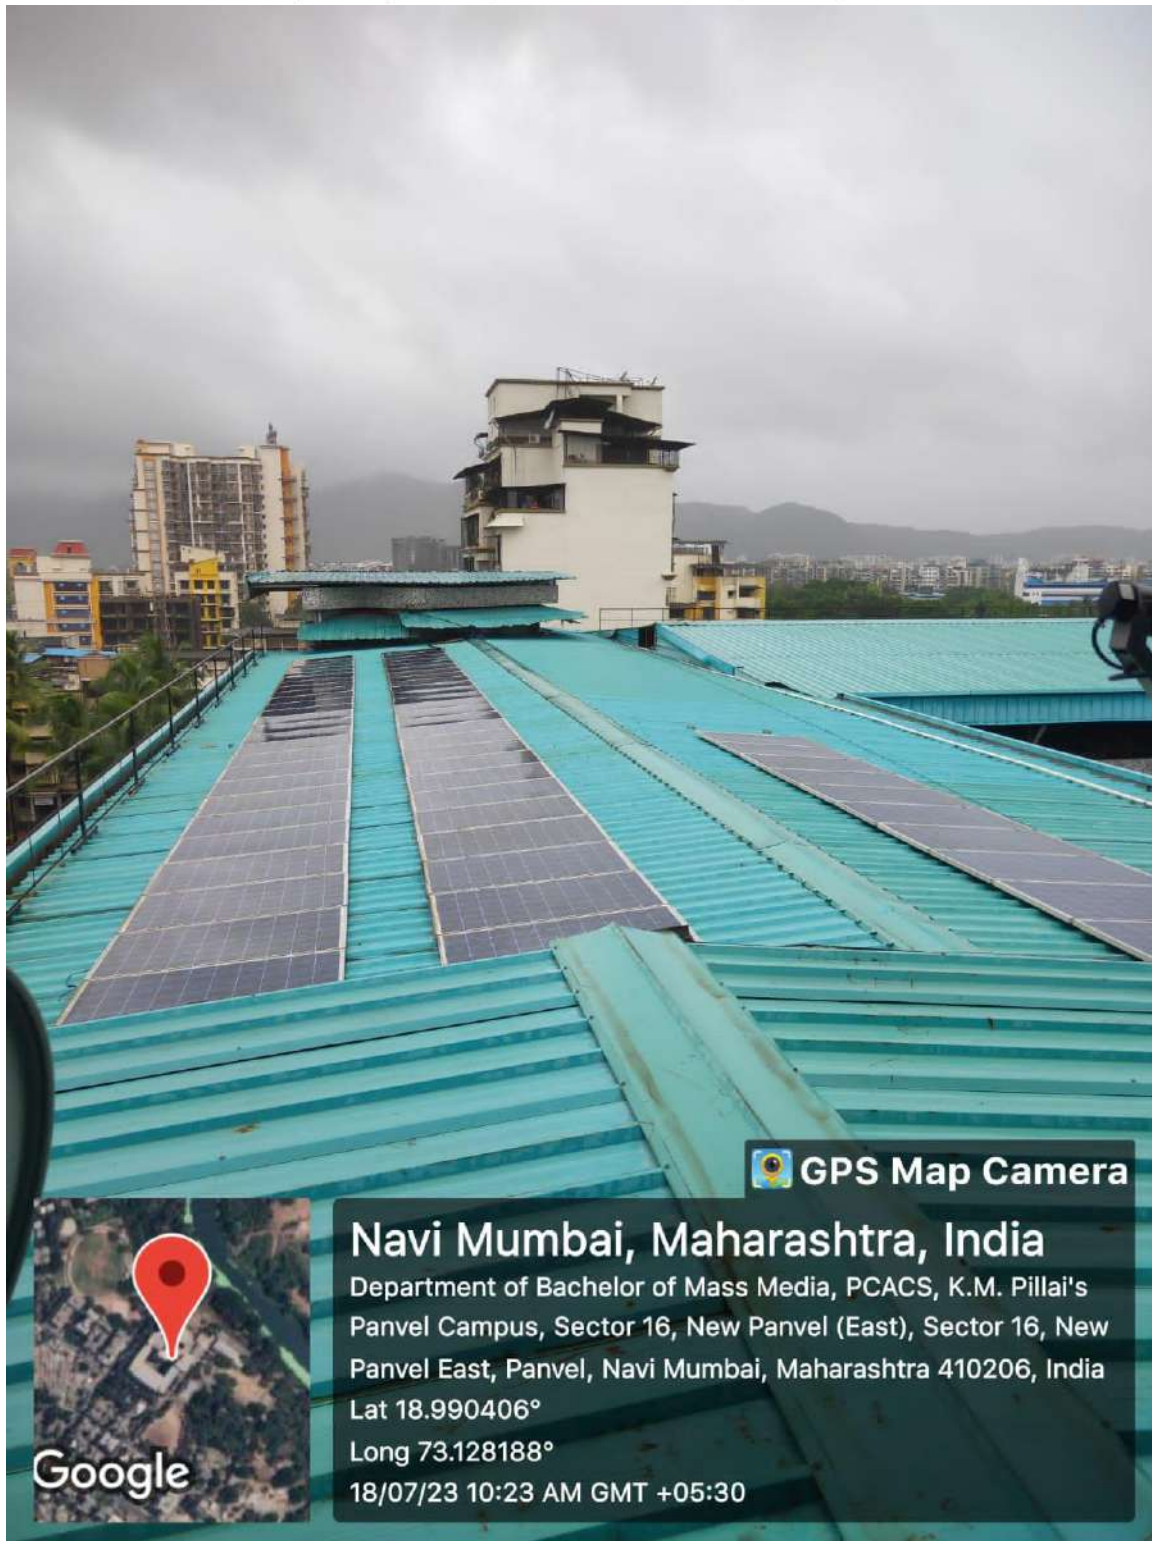

MES Pillai's New Panvel campus harnesses the power of solar energy through a solar panel installation on its rooftop, consisting of 327 solar panels. This impressive setup has a current capacity of 75 kilowatts peak (KWP), contributing to sustainable and renewable energy generation on the campus. Embracing solar power aligns with PiCA's commitment to environmental consciousness and reducing its carbon footprint.

## E-Waste Recycling

MES Pillai's New Panvel Campus has implemented an E-waste recycling program that actively collects old motherboards, hard drives, monitors, and networking equipment on its campus.

PiCA is a active part of the initiative. These electronic items are then sent to local recycling facilities for proper disposal and recycling. By conducting such a program, Pilai campus exhibits its dedication to responsible electronic waste management and environmental sustainability.

This initiative plays a crucial role in minimizing the environmental impact of electronic waste and promoting a greener and cleaner campus.

## Hostel Facility

The Pillai Group of Institutions is committed to providing high-quality education to individuals regardless of their location. Since 2010, all members of the Mahatma Education Society have been able to access the modern and excellent Pillai hostel facilities in Panvel. Each hostel building is thoughtfully designed to offer an ideal study environment while also nurturing students' personal talents, including sports and extracurricular activities. Conveniently located near the college, these hostels make it easy for both staff and students to access the facilities. Embracing the bustling location of Mumbai while enjoying the tranquillity of Panvel's suburban setting, Pillai's hostels offer a harmonious blend of academia and extracurricular pursuits, fostering a friendly and peaceful environment within walking distance of the campus.

Pillai Group of Institutions provides separate hostels for boys and girls, offering a range of room options for students. Upon request, students can avail single bedrooms with air conditioning.

Girls Hostel	Boys Hostel
Double Rooms and Six Bed Dormitories are available. Full Capacity: 300 students <a href="#">view details (.pdf)</a>	Triple Rooms, Double Rooms and Single Rooms are available. Full Capacity: 380 students <a href="#">view details (.pdf)</a>
Address: Pillai Girls Hostel Plot No. 21, Sector 16 New Panvel, Navi Mumbai - 410206	Address: Pillai Boys Hostel Plot No. 5 and 6, Sector 13 Khanda Colony, Navi Mumbai - 410206

Currently, over 600 students are enjoying the Pillai Hostel facilities, conveniently located near the Panvel Campus. The hostels offer AC options for students' comfort and convenience.

We offer a wide range of facilities to ensure that our residents are comfortable and satisfied.

- Hostel Canteen offers Breakfast, Lunch and Dinner
- Annual Meal Plans Available
- Daily Cleaning Service Available
- 24/7 Security Personnel and CCTV
- Fast Wifi Connection
- Social Areas
