Respected Sir/Ma'am,

Greetings for the day!

On behalf of Aayojan School of Architecture, Jaipur we invite you as a **speaker** for a 5-day National Level Online Faculty Development Program titled "**Tools & Techniques for Data Management and Analysis in Architectural Research**", in association with COA -TRC Pune from Dec.19 through 23,2022.

The 5-day program has been envisioned as a training program for faculties and professionals to provide the skills and knowledge they need to independently manage and analyze data for conducting the research. The training program focuses on modern research methodologies, data management, and analysis tools utilized in an architectural research inquiry. Participants will gain practical expertise with programs like SPSS, GIS, and MS Excel which are crucial tools for data analysis.

It gives us immense pleasure to extend a cordial invitation to you and your colleagues to be part of our training program.

The details for the event are as follows (for more details, please refer to the **attached poster in pdf format**):

AAYOJAN SCHOOL OF ARCHITECTURE

(Affiliated with Rajasthan Technical University)

Dear Dr. Sudnya Mahimkr,

It is our pleasure and honor to invite you as a resource person for a five-day National Training Program titled "**Tools and Techniques for Data Management and Analysis in Architectural Research**". The program is being conducted in collaboration with COA TRC and Aayojan School of Architecture, Research Wing, Aayojan Center of excellence from 19th– 23rd December 2022.

Established in the year 1999, Aayojan is the premier institute imparting architectural education in India, affiliated with the Rajasthan Technical University Kota and approved by the Council of Architecture (COA) India. ASA offers 5 Years of Bachelor's Degree in Architecture (B. Arch.), 2 Years of Master's Degrees in Architecture (M. Arch.) and Bachelor's Degree in Interior Design (B.Des). Right from its inception, Aayojan is working with an aim to be a pioneer academic institute striving for Global Excellence in cohesion with Local Wisdom.

The 5 days program has been envisioned as a training program for faculties and professionals discussing contemporary research methods, data management and analysis tools used in an architectural research inquiry. Participants would gain familiarity with methods for gathering and evaluating data in order to draw scientific conclusions about patterns and emerging trends in qualitative and quantitative data analysis.

The program is primarily designed to train Faculties, Architects professionals engaged in research. The main takeaways for the participants from the program are:

1. Knowledge of the foundations of research methodology.
2. Understanding the selection criteria for data management and data analysis in research.
3. Skills in qualitative and quantitative data gathering, description, analysis, and interpretation.
4. Hands-on experience such as SPSS, GIS, and MS. Excel etc. for data management and analysis in architectural research.

We are aware of your pioneering work and professional expertise on the subject and it is our privilege to invite you as a domain expert to conduct sessions on the following theme/s:

Data management for Architectural research

Day 2/ 20 December 2022 (2:30 pm-4:00 pm)

Your gracious presence and presentation will not only enrich the delivery of the session but also widen its scope both in academic and professional domains. The tentative schedule of the program is attached for your kind reference. We keenly look forward to your presence and will be thankful for your kind acceptance of our invitation at the earliest.

Best regards.

2. Understanding the selection criteria for data management and data analysis in research
3. Skills in qualitative and quantitative data gathering, description, analysis, and interpretation.
4. Hands-on experience on software such as SPSS, GIS and MS Excel etc. for data management and analysis in architectural research.

NOTE:

E-Certificate of said training program shall be send via email on registered email id of participants, after successful completion of training program by participant i.e. attending all sessions and submitting all assignments and feedback form of training program.

PREAMBLE:

The two key foundational facets of research are data management and data analysis. An in-depth understanding of research data management is necessary for executing an efficient study. A variety of closely related procedures are carried out as part of a general analysis of data in order to summarize the obtained material and arrange it so that it answers the research questions. A proactive data management and analysis strategy can save time and resources. Recent advancements in data management and analysis techniques have expanded research opportunities and significantly aided studies employing empirical data in architectural study. This training programme focuses on modern research methodologies, data management, and analysis tools utilised in an architectural research enquiry. Participants will gain practical expertise with programmes like SPSS, GIS, and MS Excel, which are crucial tools for data analysis.

**05 DAYS NATIONAL ONLINE FACULTY DEVELOPMENT PROGRAM ON
TOOLS AND TECHNIQUES FOR DATA MANAGEMENT
AND ANALYSIS IN ARCHITECTURAL RESEARCH**
December 19th to 23rd, 2022 | 02:30 PM - 05:50 PM

SIGNIFICANCE & OBJECTIVES OF THE PROGRAMME

Research is an ongoing process that results in new concepts, advancements, and progress. Knowledge of research techniques and instruments is necessary for an effective researcher. Massive volumes of data are routinely created and transferred in today's research-driven society, however, managing and analyzing data in the right way can lead to groundbreaking findings and insights. The process of managing and analyzing data is generally thought to be the most challenging part of conducting research. While we need to understand what to do with the data and how to interpret the results, various data management and statistical analysis tools can make this process as simple and straightforward as feasible. The objective of this Online training programme is to provide researchers in the field of architecture with the skills and knowledge they need to independently manage and analyze data for conducting the research. Participants in the planned 5-day online training program would gain familiarity with methods for gathering and evaluating data in order to draw scientific conclusions about patterns and emerging trends in qualitative and quantitative data analysis.

NOTES:

1. Teachers/ architects who wish to register for the training program either under Collaborative Training Program (CTP 2021-22/ CTP 2022-23) or as independent individuals may do so by filling up the Google form available on the link.
2. To confirm registration, kindly upload proof of payment towards the registration fees /nomination form submitting the registration form.
3. Link to join the program will be shared one day prior to the program. This program is not for students.
4. E-Certificate of said training program shall be send via email on registered email id of participants, after successful completion of training program by participant i.e. attending all sessions and submitting all assignments, EOPT and feedback form of training program
- 5.Colleges may nominate faculty under CTP 2021-22/ CTP 2022-23
6. Since the number of seats are limited so the registration would be on first come basis.
- 7.First day session would commence from 02:15 PM, the rest of the days, the timings would be 02:30 PM to 05:50 PM.
8. EOPT would be conducted on the last day of the training session i.e. 23rd of december, 2022 from 7:30 PM to 7:30 PM.

Dear Madam,

On behalf of Dr. B. N. College of Architecture, I would like to express our deepest gratitude for your invaluable contribution as the resource person in the short-term course on research methodology conducted at our institution. Your expertise, knowledge, and dedication greatly enriched the learning experience for all participants.

The interactive nature of your sessions, coupled with your engaging teaching style, fostered a stimulating learning environment. Your willingness to address their questions and concerns ensured that no query went unanswered, and every participant felt supported throughout the course.

Once again, we would like to express our heartfelt appreciation for your invaluable contribution to our short-term course on research methodology. We are immensely grateful for the opportunity to collaborate with someone of your expertise and stature. We sincerely hope to continue this partnership in the future and explore avenues for further collaboration or learning opportunities.

Thank you once again for your exceptional contribution and unwavering dedication to the success of our course.

NATIONAL ONLINE FACULTY DEVELOPMENT PROGRAM

Transformative Pedagogy as response to Contemporary Challenges of Architecture

Education and Practice

20th February 2023 to 24th February 2023

From 10:30 AM to 1:50 PM

PREAMBLE

As the world continues to change and new challenges emerge, the field of architecture and design must adapt and innovate to address these. In response to these contemporary challenges, a transformative pedagogy must be introduced that not only emphasises experimentation and collaboration but also a deep understanding of the social and cultural contexts in which we live.

By embracing a transformative pedagogy, we can inculcate creativity, critical thinking, and problem-solving skills needed to tackle the complex challenges of the 21st century. The National Education Policy (NEP) 2020 has opened several avenues encouraging holistic multidisciplinary education that will benefit the education system in many ways. The role of Council of Architecture (COA) in implementation of NEP is crucial.

KEY TAKE AWAY

The FDP aims to give the academicians a platform to understand the challenges of pedagogy tools in Architectural Educations in practical terms.

Participants will be able to explore and interpret Pedagogy through Outcome Based Education (OBE) and how criterion-based assessment is interpreted in Design studio models and teaching subjects like Architectural Design, Building Construction, Building Services, Structures etc.

Title: Community Change in Public Health

[About](#) [Instructors](#) [Syllabus](#) [Reviews](#) [Enrollment Options](#) [FAQ](#)

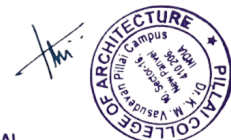

About this Course

2,925 recent views

In bringing about behavior change in public health, we often focus on the individual mother, student, or farmer. We should not forget the community structure and norms constrain for encouraging individual health behaviors. This course examines the community context of the changes needed to promote the public's health. We begin by examining the various definitions of 'community' and the processes by which we 'diagnose' or seek to understand the structure and characteristics of different types of communities.

An appreciation of community similarities and differences is necessary lest we fall into the trap of designing one-size-fits-all interventions. We need to recognize that no matter that outsiders may view a community as poor or neglected, we can find strengths and capacities for improvement in each community. Identifying community capacities and resources is the first step in facilitating community change. Different practical and philosophical approaches to change and therefore, examined. Specific to the change process is our recognition of the need for communities to participate in the design, implementation and evaluation of any intervention.

We examine the concept of participation in an effort to see how different levels of involvement may affect sustainability of community change efforts. Finally a case study of a community participatory approach to onchocerciasis control in Africa is presented. Community Directed Intervention has subsequently been successfully applied to providing other essential primary health care services by and in the community, such as insecticide treated bednets, malaria treatment, vitamin A distribution, deworming medicines, and pneumonia and diarrhea case management.

Dear Madam,

I hope you are doing well and safe at home. As per our telephonic conversation, dated 28th July 2020, please find below the details of our National e-conference.

M.C. E. Society's Allana College of Architecture, in association with **Dr. Babasaheb Ambedkar Technological University, Lonere** and **IIA, Maharashtra Chapters Pune Centre as our Knowledge Partner** is organizing for a **National E- conference on Empirical Theories in Architecture, Planning and Construction Management (NCET- 2020)** on the **7th and the 8th of August 2020**.

The National e-Conference on Empirical Theories in Architecture, Planning Construction Management is devoted to the idea of encouraging diverse concepts which are more experience, and opinion based in addition to the theories already known. The attempt is to bridge the gap and integrate research with practice formally thereby enhancing the quality of Education, Architecture and Environment.

The key themes of the National e-Conference, '**Architecture, Design & Planning**', '**Construction Management**' and '**Pedagogy & Architectural Education**', cover an array of topics that enables the Students, Academicians and Practitioners to showcase their notions, hypotheses and ideologies evolved and devised through research and practice.

We had invited **Students of B.Arch. & M.Arch. courses** from all Colleges in India, **Researchers, Academicians & Practicing Architects** with the expertise in **Architectural Design, Urban Planning, Urban Design, Conservation, Sustainable Architecture, Environmental Management, Construction Project Management, Architectural Education and allied disciplines** to present their research papers.

Madam, we would like to invite you ONLINE as a **Jury Member** for our ARP panel (Academicians, Researchers, Practitioners), **session from 9.30 am - 12.00 noon**, on the second day of the Conference, i.e., on the **8th of August 2020**. We will be sending over the abstracts of the presentation papers to you shortly, in addition to the final program schedule.

You would be accompanied by Dr. Parag Narkhede, HoD, BKPSCoA, Pune for the ARP review panel. He is our Mentor for NCET-2020 and a part of the Technical Review Committee team assessing the papers.

Please find attached a poster for the Conference as was prepared earlier for the conference to be held on the 23rd and the 24th of April 2020.

Please convey your acceptance to our invite as Jury Member for our NCET-2020.

We also request you to provide us with the following:

- Your Credentials
- A Colour Photograph
- Your Bank Details including Account Holder's Name & No., Savings / Current Acc., Bank & Branch Name, City, IFSC

Please feel free to contact me in case of any queries.
Looking forward to a positive reply.

Thanking you.

Faculty Induction Program

for Young teachers and to-be Teachers of Architecture

Learning to Teach and Teaching to Learn

Coordinated & Convened by

Prof. Jayashree Deshpande, Director, COA-TRC, Pune

The contribution of a teacher is crucial to the strengthening of the professional fraternity and the nation's intellectual infrastructure. Not merely constrained to the delivery of academic content, the role of a teacher surpasses classroom boundaries to become a learning facilitator, resource developer, evaluator, guide, mentor, counselor and role model. Teachers of architecture, although from the professional field, cannot be an exception to the rule.

The program, specially designed for teachers of schools of architecture, aims to sensitize teachers about new concepts in teaching and enables the participants to develop competence in understanding recent advances in education technology, to learn to improve pedagogies and to better their inter personal skills in order to become effective faculty.

The topics expected to be covered during the program include:

- The psychology of the teaching-learning process
- Qualities and Roles of a teacher
- The philosophy of education and theory from the field of education
- Trends of teaching in Architecture in India
- Creative teaching techniques for application in the design studio
- Overview of the design process
- Models of teaching and their application to subjects in the architecture curriculum
- Creative exercises to enhance the quality of teaching in architecture
- How to handle various subjects in the curriculum of the undergraduate course in architecture.

Registration Process

Teachers/ architects who wish to register for the training program either under Collaborative Training Program (CTP) or as independent individual may do so by filling up the attached Google form.

Registration fees (Independent Individual Registration):

- Rs. 10,000/- (without accommodation)
- Rs. 15,000/- (with accommodation on sharing basis)

Only in case nominated teachers registered for this program under CTP, require provision of accommodation, the facility of accommodation on sharing basis, breakfast and dinner for five days can be availed of by payment of Rs. 5,000/- per head by online payment/ bank challan.

Title: Introduction to GIS

About this Course

86,452 recent views

Get started learning about the fascinating and useful world of geographic information systems (GIS)! In this first course of the specialization GIS, Mapping, and Spatial Analysis, you'll learn about what a GIS is, how to get started with the software yourself, how things we find in the real world can be represented on a map, how we record locations using coordinates, and how we can make a two-dimensional map from a three-dimensional Earth. In the course project, you will create your own GIS data by tracing geographic features from a satellite image for a location and theme of your choice. This course will give you a strong foundation in mapping and GIS that will give you the understanding you need to start working with GIS, and to succeed in the other courses in this specialization.

This course is for anyone who wants to learn about mapping and GIS. You don't have to have any previous experience - just your curiosity! The course includes both practical software training and explanations of the concepts you need to know to make informed decisions as you start your journey to becoming a GIS analyst.

You will need a Windows computer with ArcGIS Desktop installed. (software is not provided)

About this Course

146,593 recent views

This MOOC is about demystifying research and research methods. It will outline the fundamentals of doing research, aimed primarily, but not exclusively, at the postgraduate level. It places the student experience at the centre of our endeavours by engaging learners in a range of robust and challenging discussions and exercises befitting SOAS, University of London's status as a research-intensive university and its rich research heritage.

The course will appeal to those of you who require an understanding of research approaches and skills, and importantly an ability to deploy them in your studies or in your professional lives. In particular, this course will aid those of you who have to conduct research as part of your postgraduate studies but do not perhaps have access to research methods courses, or for those of you who feel you would like additional support for self-improvement. No prior knowledge or experience in research is required to take this course and as such, the course is for everyone.

This MOOC draws on a wealth of existing course material developed to support research training across SOAS, University of London and particularly drawing from the Centre for International Studies and Diplomacy (CISD). In 2015, the course was nominated for the prestigious Guardian University Award for its innovative approach to online learning.

Participation in or completion of this online course will not confer academic credit for University of London programmes
